

Part # TCR-150-(X)-(X)

Surface Mounted, High Impact Crash Rail, 6" Height (150mm)

Features

- Standard Lengths are 12"
- Rigid PVC Tensile Yield, 6100 psi as specified in ASTM D-638, wall thickness .080. (PETG if applicable CNDD)
- Chemical and Stain Resistance in accordance with ASTM D-543.
- Fungal and Bacterial Resistance in accordance with ASTM G-21 and ASTM G-22.
- Aluminum Retainers are extruded from 6063-T5 alloy, tensile strength of 29,000 psi, a yield strength of 25,000 psi, an elongation
- Class "A" Fire Rating

Quick Installation

Crash Rail Systems: Cut Aluminum and Impact Absorber to desired length, attached end caps to the aluminum, attach aluminum to the wall, then cut cover to desired length and snap onto the aluminum. When a splice occurs always splice the aluminum retainers and the PVC covers at different locations along the run. The use of back-up channels at stud wall conditions is recommended.
